

***Providing HVAC and Sheet Metal Fabrication Capabilities for commercial, industrial, education institutions and government.***

## **HVAC and Sheet Metal Fabrication Services**

Cromedy Construction (CCC) is an 8a/MBE/DBE certified sub and prime general contractor specializing in projects with an emphasis on self-performing HVAC and Sheet Metal fabrication, installation, and service.

Since 2004, CCC has provided superior HVAC and Sheet Metal services throughout Tristate area. We are a customer focused organization with an outstanding record of project completion ahead of schedule, on time, and under budget. Our focus is plan and spec as well as Design-Build construction which eliminates contract modifications for unforeseen conditions.

CCC strives to provide value as an experienced major project contractor which insures a positive customer project experience. Our most important project is our next project, which only comes from customer satisfaction on each and every project.

CCC performs turn-key HVAC and Sheet Metal services for projects that range in size from a few thousand dollars to projects in the millions. Our state of the art fabrication equipment gives us both effective and efficient control over every project schedule. We understand the complexities of all types of commercial HVAC projects and the need for coordination with the entire project team. The importance of maintaining open communication with the owner as well as other contractors is paramount to any successful project completion.

The quality of our work, team attitude, sound business ethics, and overall ability to meet schedules are deeply embedded in our corporate culture. As our client, you can rest assured that Cromedy Construction will always be part of the overall solution.
