

*Providing General Contracting and Construction Management services for residential, planned community, industrial, commercial and government related construction projects for the mid-*

## Turn-Key General Contracting and Construction Management

Cromedy Construction (CCC) is an 8(a) SDB, MBE/DBE general and specialty contractor established in 2004. Our core competencies lie in both General Contracting and Construction Management with a self-performance capability in sheet metal fabrication and mechanical construction, new construction, tenant refit and renovation, historical renovation, and MEP. We serve numerous markets along the eastern seaboard of the United States performing projects ranging in size from a few thousand dollars to several million dollars. Our resources, knowledge, experience, financial strength, and stability provide our clients with a experienced contractor that gets things done.

At CCC we understand the complexities of these types of projects and the need for coordination with the entire project team. We recognize the importance of maintaining open communication with the both the owner and our own subcontractors so that we can be sure our work processes are never in conflict. If a problem arises, we will do all we can to facilitate the success and ultimate delivery of the project.

Our quality of work, unparalleled business ethics, and overall ability to meet schedules, help to achieve an enjoyable successful project large or small for our customers
